

WORKSHOP: 2015-06-18 "Academia: what can I do next (and how)"?

The content was good and interesting	The presentations in the first part were useful	The experience of the panel members provided a useful/informative perspective.	Your overall appreciation of the workshop is:	What were the strong points of the workshop?	What were the weak points of the workshop?
1: no; 5: yes					
3	4	5	good	the mentors during the panel discussion	it was quite long altogether
4	4	4	excellent	The first presentation	I think too much info was provided on how to apply for grants.
4	4	3	excellent	Very well organised and lots of effort had been put into the workshop	While the panel provided an informative perspective, it wasn't practically useful because it was so apparent that there wasn't a recipe of success
4	5	4	good	Detailed and well structured information	
4	5	5	good	We could find links for a lot grand applications	Provide also printed info
5	5	5	excellent	The discussion with so many panel members.	The networking area was not fantastic, i would prefer a table outside the room.
5	3	5	good	The discussions	The presentations in the first part were sometimes more useful for assistant professors than for post-docs
4	4	3	good	people invited to speak	the point of view from people responsible for academic recruitment was missing
2	2	2	average	Some interesting comments from junior faculty members	Nothing really new from the 1st part / too many banalities from the panel discussion
5	4	4	average	variety of speakers, detailed information in the first part	it took a while to get the discussion going, we need more participation
5	5	5	excellent	Really adressing postdocs	Maybe there were too many speakers for the roundtable
4	4	4	good		
4	3	4	good	To see that in the system there are different visions and ways to reach the same objective	The presentations were focus on the actual way to get money and independancy for persons that have a classical and bright CV. For most of them it's known or possible to find it easily. Alternatives aming to get money and independancy when we don't have the ideal CV but good idea would be very valuable. The fondations were, as an example, a beginning of what would be valuable to better know.
5	4	4	excellent	broad knowledge exchange	not so clear about the aims
5	5	5	excellent	broad overview from different disciplines	
AVERAGE	4.2	4.1	good-excellent
